IMPORTANT INFORMATION ABOUT COLORS AND FINISHING IN THIS BROCHURE

For technical reasons related to the production of this catalogue, the colors and effects represented here are given as an indication. Whether *SKIN*, *NUANCE* or *ROCK* finishes, the representations made of colors, finishes, materials or textures are not contractual.

NUANCE range:

A guarantee cannot be given for this type of color chart. Slight color and gloss variations may occur compared to the listed colors. This color chart should only be used to give a general idea of the colors. It is not suitable for color matching.

Only the original color standards from the RAL 840 HR (semi-gloss) and RAL 841 GL (high gloss) color file have «legal force» for the production and testing of RAL colors. The same applies to the other color standards (BS 14C39-BEIGE E8 20 60-BEIGE F2 10 70).

Warranty for the color durability:

- Standard colors: 10 years warranty except for colors marked with a *, these have a 5 year warranty.
- Other colors please consult us

SKIN range:

The process of applying the decorative film to the panels is carried out by thermal lamination. Therefore, the patterns and reliefs of the films prior to their application may differ on the final product.

ROCK range:

The panels in the *ROCK* range are the result of a manufacturing process which ensures an original finish, as with natural minerals. So each panel has a raw appearance close to that found in nature. Even if the basic color remains the same, the varying texture means that each panel manufactured is unique and will not look like any other. It will give your facade a natural look by avoiding the repetition of identical patterns.
